

Recycling of Freon based products (Air conditioners & Refrigerators)

The Borough of Somerville and Somerset County will NOT accept Freon based products (Air conditioners & Refrigerators) as garbage or recycling pickup or drop off. The Freon must be reclaimed out of the unit at an authorized reclamation facility. Most heating and air-conditioning facilities have this ability and will take your Freon based products in and dispose of for a fee. Your best solution may be when making purchase on a replacement to have the store in which you make purchase take the old unit back from you at their fee.
